EDUCATION

Addis Ababa University (Top 10 Universities in Africa)

Addis Ababa, Ethiopia

Bachelor of Computer Science, GPA: 3.98/4.00

2024 – 2028

- **Relevant Courses:** Linear Algebra, Calculus, Object-Oriented Design, Database Systems, Operating Systems, Machine Learning, Probability and Statistics, Computer Networking, Distributed Systems, Analysis of Algorithms

A2SV – Africa to Silicon Valley (Google-backed)

Addis Ababa, Ethiopia

Data Structures & Algorithms

Jan 2026 – present

- A2SV-trained engineer with a strong DSA foundation; solved 250+ problems on [LeetCode](#) and [Codeforces](#) with a focus on graph theory and dynamic programming.

TECHNICAL SKILLS

Programming Languages:	Python, Java, C++, C#, JavaScript
Backend:	Node.js, Express.js, NestJS, Next.js
Databases:	PostgreSQL, MongoDB, MySQL, Redis
AI/ML & Optimization:	TensorFlow, NumPy, Scikit-learn, OpenCV, YOLOv8, Linear Programming
Tools:	Git, Linux, HuggingFace, Docker, Streamlit

PROFESSIONAL EXPERIENCE

AAU ML Intern – AI Researcher (TWELVE Football-backed)

Remote, Sweden and Ethiopia

Football Video Analytics Pipeline

Nov 2025 – Jun 2026

- Contributed to an end-to-end football video analytics platform using **Python**, **OpenCV**, **YOLOv8**, **ByteTrack**, and **Streamlit** to detect, track, and analyze players and the ball from match footage.
- Implemented **multi-object tracking**, **team classification (HSV + KMeans)**, **homography-based pitch mapping**, **optical-flow camera motion compensation**, and **Kalman-filter ball tracking** for accurate real-world player metrics.
- Built a **stateful event detection pipeline** to identify passes, crosses, skill moves, possession, player speed, and heatmaps, exporting structured **CSV/JSON analytics** and annotated videos.

Information Network Security Administration

Addis Ababa, Ethiopia

ML Engineer Intern

Aug 2025 – Sep 2025

- Automated collection and preprocessing of **network log data** using **Python** to improve analysis efficiency.
- Analyzed network logs using **Python (Pandas)** and **SQL** to extract meaningful insights and support security investigations.
- Created data visualizations and summary reports highlighting network activity, anomalies, and usage trends.

OHIO Global One Health

Addis Ababa, Ethiopia

Technical Assistant

Aug 2025 – Sep 2025

- Digitized and organized documentation using office productivity tools, improving the efficiency of document retrieval and data management.

KEY PROJECTS

Amharic Sentiment Analysis | [GitHub](#) | Python, Scikit-learn, NLP, TensorFlow

2025

- Built a machine learning pipeline to classify Amharic text into positive, negative, or neutral sentiment, addressing the challenge of NLP in a **low-resource language** with limited labeled data.
- Designed custom **text preprocessing and tokenization** strategies tailored to Amharic morphology, improving model accuracy on noisy real-world social media text.
- Benchmarked multiple classification models to identify the optimal approach for low-resource sentiment analysis.

CP-Focus – Competitive Programming Distraction Blocker | [GitHub](#) | JavaScript, Chrome Extension API 2025

- Built a **Chrome extension** that blocks AI chatbots while the user is active on competitive programming platforms including Codeforces, LeetCode, and AtCoder.
- Implemented a **progressive hint-unlock system** to encourage independent problem-solving, alongside timed focus sessions and personal productivity statistics.
- Designed a lightweight, event-driven architecture with **zero external dependencies** for fast, privacy-respecting performance.

Fintech Review Analytics Pipeline | [GitHub](#) | Python, Pandas, NLP, Scikit-learn

2025

- Engineered a rigorous **end-to-end analytics pipeline** that ingests raw Google Play Store reviews and transforms them into actionable product insights.
- Applied **sentiment quantification and topic modeling** (LDA/clustering) to surface recurring themes, pain points, and feature requests from thousands of unstructured user reviews.
- Translated analytical findings into a structured report with visualizations, enabling product teams to prioritize improvements with confidence.

ACHIEVEMENTS & LEADERSHIP

- **Quantum Computing Summer School** – Completed a year-long comprehensive program with **Great Distinction**; mastered quantum mechanics, quantum protocols, and quantum algorithms.

- **EOTC OpenSource** – Volunteered as a project lead, driving ongoing open-source development for the Ethiopian Orthodox community.
- **Datanomics International Scholarship** – Awarded a \$3,000 data science scholarship; trained by Google Developer Experts in applied ML and data engineering.
